## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- I. Claims 1-11 and 17-25, drawn to a method of preparing a medical solution
- II. Claims 12-16 and 26-30, drawn to a solution and method of using

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: As demonstrated by the "Y" reference(s) on the International Search Report, at least one independent claim of the application does not avoid the prior art, therefore, the special technical feature of the application is anticipated by or obvious in view of the prior art. Consequently, the inventions listed as Groups (or Species) I-II do not relate to a single general inventive concept under PCT Rule 13.1. Specifically, the specially technical feature shared by the independent claims is a sterilized solution comprising one or more acetylated or deacetylated amino sugars having a pH of 2.0-5.0. The combination of Jonsson et al. (U.S. Patent No. 5,536,469) and the document "Replacement of glucose with N-

acetylglucosamine in peritoneal dialysis fluid-experimental study in rats" disclose the claimed special technical feature.

Consequently, the inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
